

ASTON UNIVERSITY PROGRAMME SPECIFICATION

Programme Title	Computing Science
UCAS/JACS Code	G400
School/Subject Area	Engineering and Applied Science / Computer Science
Final Award	BSc Honours
Interim Awards	Certificate of Higher Education Diploma of Higher Education
Mode(s) of Study	Full-Time or Sandwich including optional placement year
Normal Length of Programme	3 academic years (full-time) or 4 years (sandwich, comprising: two academic years; 40 week placement during third year; final academic year)
Total Credits	360 (full-time), 480 (sandwich)
Programme Accredited By	British Computer Society Chartered IT Professional (CITP) Accreditation
Dates Programme Specification Written and Revised	December 2002, August 2006, August 2007, August 2008, July 2011

Education Aims of the Programme	<ul style="list-style-type: none"> • Produce Graduate Software Engineers who specialize in object-oriented software design and Implementation. Graduates will be highly attractive to employers and well prepared for a rewarding career as a computing professional adaptable to a wide range of employment opportunities. • Develop practical information systems engineering capability based on well-founded principles, allowing graduates to be seen as candidate software engineers. • Promote generic attributes appropriate to professionally oriented graduates. • Enable students opting for the sandwich variant of the programme to enhance their career preparation through a period of structured professional training. • Provide a participation route leading to professional computing employment that is accessible to students who have demonstrated good intellectual aptitude rather than necessarily subject-specific preparation.
Relevant Subject Benchmark Statements and other External and Internal Reference Points used to inform programme outcomes	<ul style="list-style-type: none"> • UK Quality Code Part A.1 (2011) • Quality Assurance Agency for Higher Education subject benchmark statement for Computing • Professional approval requirements of the British Computer Society • Curriculum recommendations of the Association for Computing Machinery • SFIA Skills Framework for the Information Age

Programme Structures and Requirements: Levels, Modules and Credits						
Stage 1						
Module Title	Credits	Level	Module Code	Core/Option	Condonable	Prerequisites
Information Systems and Databases	20	4	CS1050	Core		
Academic and Professional Communication Skills	10	4	CS1150	Core		
Introduction to Computer Systems	10	4	CS1170	Core		
Internet Computing	10	4	CS1240	Core		
Mathematics for Computing Professionals	10	4	CS1260	Core		
Java Programming Foundations (CS)	20	4	CS1310	Core		
Problem Solving	10	4	CS1320	Core		
Java Program Development	20	4	CS1410	Core		
Computer Systems Organisation	10	4	CS1420	Core		
TOTAL	120					

Programme Structures and Requirements: Levels, Modules and Credits						
Stage 2						
Module Title	Credits	Level	Module Code	Core/Option	Condonable	Prerequisites
Group Project (CS)	20	5	CS2010	Core		
Software Engineering	20	5	CS2020	Core		
Programming Language Concepts	10	5	CS2130	Core		
Computer Graphics	10	5	CS2150	Core		
Professional and Social Aspects of Computing	10	5	CS2160	Core		
Operating Systems	10	5	CS2230	Core		
Human-Computer Interaction	10	5	CS2260	Core		
Data Structures and Algorithms with Java	10	5	CS2310	Core		
Introduction to Computational Intelligence	10	5	CS2320	Core		
Internet Applications and Techniques	10	5	CS2410	Core		
TOTAL	120					

Programme Structures and Requirements: Levels, Modules and Credits						
Stage 3 P						
Module Title	Credits	Level	Module Code	Core/Option	Condonable	Prerequisites
Choose 120 credits from the following options						
EAS Study Placement Year	120	P	SEP001	Option		
EAS Industrial Placement Year	120	P	SEP002	Option		
TOTAL	120					

Programme Structures and Requirements: Levels, Modules and Credits						
Stage F						
Module Title	Credits	Level	Module Code	Core/Option	Condonable	Prerequisites
Individual Project	40	6	CS3010	Core		
Testing and Reliable Software Engineering	10	6	CS3270	Core		
Software Project Management	10	6	CS3360	Core		
Choose 60 credits from the following options						
Computer Animation	10	5	CS2420	Option		
Mobile Design and Development	20	6	CS3040	Option		
Enterprise Application Technology	10	6	CS3160	Option		
Information Security	10	6	CS3190	Option		
Geographic Information Systems	10	6	CS3210	Option		
Multimedia Information Retrieval	10	6	CS3320	Option		
Image and Video Processing	10	6	CS3330	Option		
Multi Agent Systems	10	6	CS3340	Option		
Interaction Design	10	6	CS3410	Option		
Data Mining	10	6	CS3440	Option		
Game Development	10	6	CS3450	Option		
Enterprise Computing Strategies	10	6	CS3460	Option		
TOTAL	120					

Programme Outcomes, Learning and Teaching and Assessment Strategies

Knowledge and Understanding

On successful completion of their programme students, are expected to have knowledge and understanding of:		Learning, Teaching and Assessment Strategies to enable outcomes to be achieved and demonstrated	
		Learning and Teaching Methods	Assessment Methods
1	Concepts and principles of information systems engineering (ISE), emphasising software engineering, computer systems and application technologies	<p>A mixture of formal lectures, tutorial classes, computing laboratory classes, independent practical work associated with taught and project modules, independent study.</p> <p>For the sandwich option, an agreed programme of professional experience and training.</p>	<p>Knowledge and understanding are assessed through unseen examinations and project reports, and (particularly in the case of (2)), through coursework reports. Assessment of the sandwich option is based on:</p> <ul style="list-style-type: none"> • a reflective log-book kept by the student • an analytical final report written by the student • reports by an academic supervisor, taken together with the employers views.
2	Analysis, design and implementation methods applicable to ISE		
3	Mathematics relevant to ISE		
4	The legal, social and ethical context for professional ISE		
5	Problem solving strategies		
6	Concepts and principles and methodologies relevant to chosen areas of specialisation, thereby achieving additional depth and breadth		
7	(Sandwich students only) The relevance of the programme's discipline-specific and generic content to the professional world		

Intellectual Skills

On successful completion of their programme students, are expected to have knowledge and understanding of:		Learning, Teaching and Assessment Strategies to enable outcomes to be achieved and demonstrated	
		Learning and Teaching Methods	Assessment Methods
1	Analyse requirements of computing solutions and design solutions	<p>Intellectual skills are developed through formal lectures (often including suitable case studies), tutorial classes, practical work (both assessed and unassessed) associated with taught modules, and project work.</p>	<p>Unseen written examinations, coursework submissions relating to design exercises, project reports and presentations.</p>
2	Plan, conduct and report on a programme of work covering multiple ISE lifecycle stages and leading to an end-product, with evaluation of end-product and process		
3	Integrate and apply knowledge and methods from a variety of sources		

Professional Skills			
	On successful completion of their programme students, are expected to have knowledge and understanding of:	Learning, Teaching and Assessment Strategies to enable outcomes to be achieved and demonstrated	
		Learning and Teaching Methods	
		Assessment Methods	
1	Construct, test and document computer software	Formal lectures (including suitable case studies), tutorial classes, practical work (both assessed and unassessed) associated with taught modules, and project work.	Unseen written examinations, coursework submissions relating to design exercises, project reports and presentations.
2	Use a variety of programming languages, software tools and environments		
3	Apply Internet technology		
4	Prepare technical reports and presentations		
5	Use appropriate diagrammatic and formal written notations in design work and in reports		

Transferable Skills			
	On successful completion of their programme students, are expected to have knowledge and understanding of:	Learning, Teaching and Assessment Strategies to enable outcomes to be achieved and demonstrated	
		Learning and Teaching Methods	
		Assessment Methods	
1	The ability to communicate effectively in writing and through technical diagrams	Written and oral communication and information skills are taught in a dedicated module employing tutorial classes and practical work. Other skills are developed through practical work for taught modules, project work, and the professional placement option.	An English Speaking Board oral examination provides independent certification for (1). Other assessments (particularly project reports and presentations) provide direct or indirect evidence of the level of skills acquired.
2	The ability to communicate effectively through oral presentation		
3	Information gathering skills		
4	Team-working skills		
5	A capability for independent working able to tackle substantial practical problems with limited individual guidance		
6	Problem solving skills		
7	Good ICT skills		
8	Time management skills		

Entry Requirements	<p>Typical A Level Offers: ABB-BBB at GCE A level/AVCE Combination of 2 A level and 2 AS level subjects accepted Additional AS levels are taken into account when confirming places GENERAL STUDIES ACCEPTED? Yes BTEC, IB, ACCESS, SCOTTISH/IRISH QUALIFICATIONS: All accepted. BTEC: 13 Units at grade Distinction. IB: 31-33 points SPECIFIC SUBJECT REQUIREMENTS: GCSE Grade B or above in Mathematics and GCSE Grade C or above in English (or recognized equivalent qualifications).</p>
Programme Regulations	<p>Attendance requirements Full-time students are normally required to attend the University for the first, second and third term of each of three consecutive academic years. Sandwich students are normally required to attend the University for the first, second and third term of the first, second and fourth of four consecutive academic years, and undertake an integrated programme of professional training between the second and fourth academic years. The approved specification for any particular module may include assessment elements that require attendance at scheduled classes.</p> <p>Professional Training The programme of professional training undertaken by a sandwich student must be approved by the Associate Dean for Undergraduate Programmes and of at least 40 weeks duration, excluding any periods of vacation. It will be assessed on a pass/fail basis and will not contribute to the overall degree classification.</p> <p>Specific assessment requirements for modules The module <i>CS1310, Java Programming Foundations</i>, is fundamental to the entire programme of study and cannot be condoned for progression on the Honours Degree, but may be condoned for progression on the Ordinary Degree. The module <i>CS3010, Individual Project</i>, may not be condoned for an Honours Degree.</p> <p>Requirements for the Ordinary Degree The modules taken in a particular stage of study by a student who has transferred to the Ordinary Degree are derived from those for the corresponding stage of the Honours Degree by omitting selected modules to reduce the credit requirement of the stage. The modules omitted must be approved by the Associate Dean for Undergraduate Programmes. Project modules (CS2010 and CS3010) cannot be omitted.</p> <p>Exemptions from (Professional Qualification) examinations BCS Accreditation means that a graduate has fulfilled the academic requirement for registration as a Chartered IT Professional (CITP)</p>

General Regulations (<http://www1.aston.ac.uk/registry/for-staff/regsandpolicies/general-regulations/>) and the Regulations for the programme (above) take precedence over other information sources such as student handbooks if there is a conflict. If there is a conflict between General Regulations and Programme Regulations then General Regulations take precedence unless an exemption has been approved.

This specification provides a concise summary of the main features of the programme and the threshold learning outcomes that a student might normally be expected to achieve and demonstrate if he/she takes full advantage of the learning opportunities that are provided. **The individual modules included in the programme may differ from those included in this programme specification as our programmes are subject to continuous review.** Information on admissions requirements and career opportunities is available in the relevant prospectus. More detailed information on the learning outcomes, content and teaching, learning and assessment methods of each module can be found in the appropriate module guides and programme handbook(s) which are available to students on enrolment.
