Based on current fees £575 per 10 credits.

Course outline and what you will study

This course will provide you with the knowledge base to support provision of a service for patients with a wide range of hearing and hearing related problems.

This module introduces the function & disorders of the auditory system, audiological assessment, and management of hearing disorders in adults. It encourages students to engage with evidence-based decision making and to develop the higher thinking skills that are essential for advanced clinical practice in adult auditory rehabilitation.

Learning, teaching and assessment

This course is delivered via attendance on campus and distance learning. You will access learning materials for general study, revision and assessment via our virtual learning environment, Blackboard. This platform allows you to access a comprehensive range of study materials, scientific journals, e-journals, databases and much more.

Assessment

Online tasks and written essays.

Our courses are written and delivered by staff at the forefront of Life and Health Sciences teaching and research. Many members of staff practise / have practised professionally. In the recent Teaching Excellence Framework assessment, Aston University was awarded Gold, the highest award possible. In addition, our courses are regularly reviewed by relevant professional experts.
