

Are you a parent of a 6-15yr old Interested in research?

We are researchers from the **Aston University Institute of Health and Neurodevelopment** looking for children and adolescents aged up to 16 years old to take part in a research study!

We want to help doctors understand rare autoimmune diseases of the brain in children, by **looking at the differences in brain scans and developmental skills between children with these diseases and those without.**

What might taking part involve?

Child MRI scans

A safe non-invasive way of taking a picture of the brain, using research scanners at the University Neuroimaging Facility.

Child MEG scans

A safe way of measuring the activity in the brain as different areas of the brain 'talk' to one another.

Child assessments

To find out about thinking skills and development

Family assessments

Online questionnaires about the child and caregiver

Vouchers as thank you for taking part!
